

# BIOHAZARD SPILLS

## WHAT TOOLS DO YOU NEED?

Wet Floor Sign

Biohazard Kit\*

Contact your Ecolab representative for more information on how to order tools.

**TB Disinfectant Cleaner**  
Ready-to-Use

**USAGE NOTES:** Refer to product label for usage information related to safety, PPE requirements, dilution and surface compatibility.

\*Biohazard kit contains a disposable plastic apron, face mask, shoe covers and disposable gloves.

# BIOHAZARD SPILLS

1

Close or block off the affected area using “Caution – Wet Floor” sign or safety cone. Put on disposable plastic apron, face mask and shoe covers, then put on the disposable gloves.

4

Using disposable shovel and paper towels, completely pick up all of the jelled substance. Place it in a black trash bag. (For blood spills, use red bags instead of black.) Seal the black or red bag tightly with twist tie.

2

Sprinkle the absorbent material onto the spill and allow it to stand for time specified by the product label or until the fluid is fully absorbed and jelled.

5

Put sealed black or red bag into second black bag (or red bag for blood spills). Do not seal outer black trash bag. Once spill is completely cleaned up, place disposable shovel into outer black/red trash bag.

3

Apply **TB Disinfectant Cleaner Ready-to-Use** to the spill. Hold bottle 6"–8" from the surface. Spray area until it's covered with the solution. Allow product to penetrate and remain wet for time specified by the product label.

6

Use paper towels and additional **TB Disinfectant Cleaner Ready-to-Use** to clean up surrounding areas that may have been affected by spill. Place all soiled paper towels into outer black/red trash bag.

# BIOHAZARD SPILLS

7

Once more, apply the **TB Disinfectant Cleaner Ready-to-Use** to the area following directions for use on product label. Allow product to penetrate and remain wet for time specified by the product label. If the spill is on a food contact surface, after disinfection you must rinse surface with potable water. (Sanitation may also be necessary in accordance with your local health codes.)

9

Seal outer black or red trash bag tightly with twist tie. Place sealed black trash bag into a dumpster outside of restaurant. Do not discard in indoor trash receptacle. (Red bags must be disposed according to local guidelines.)

8

Pull up on apron sleeves to rip thumb loops. Remove the apron, face mask and shoe covers and place into outer black/red trash bag. Remove gloves as follows (reference step-by-step illustrations for glove removal).

10

Thoroughly wash and sanitize hands. Remove wet floor sign and reopen the affected area.
